

Dedicated To Professional Animal Care

Dear User,

Since the American Association of Zoo Keepers published the original Animal Data Transfer form for use, technology has advanced, and so has the field of animal care. The need for an updated version of the ADT form was apparent and the requests for change were heard.

The ADT now exists as a fillable pdf form. It is understood that not all users will have Adobe programs. This form can be opened with free pdf programs such as, Xodo PDF Viewer and Editor, Adobe Acrobat Reader DC, and even Google Drive.

This version of the ADT was produced to be user friendly, with more fields to share information. As with all new things, some bugs may need fixed as this is rolled out. If there are any challenges or further suggestions, please contact AAZK's Animal Welfare Committee at awc@aazk.org.

Sincerely,

Kristen Scaglione
